*"As an experienced consultant and practitioner who has worked with many assessment tools in the past, I am really fascinated with the holistic approach of the CRG tools. Despite being simple to use and understand, the tools have sufficient depth in overall concept to support the necessary foundation for personal, team, and organizational development. I highly recommend the CRG Assessment Systems Certification Workshop for those wanting to improve their self-mastery as well as those who wish to use the tools to help others find their passion and purpose!"*
